

Launching Your American Dream

HOOSIER PONTON TRAILERS

*The ultimate
in launching
and trailering
pontoon boats
of all sizes.*

The **WFB Float-On Hoosier Trailer** enables you to realize your dreams of taking your pontoon to any body of water effortlessly. They are built to easily launch your boat in shallow water as well as providing improved road handling characteristics. An 84" wide track axle also enhances road stability.

The WFB Series carpeted 2x4's gently cradle the pontoon and permit increased access. In fact, the Float-On trailer is totally adjustable and can fit most pontoon boats. Available in 13 models, the trailer comes in single, tandem, and triple axle configurations. Galvanized finish, surge and electric brakes, tritoon kits, load guides, and spare tires are optional.

Standard equipment includes: 20.5" x 8" x 10" "E" range tire assemblies, treated bunks, torsion axles with independent suspension, loading/unloading winch with strap and hook, adjustable bunks and winch stand, tongue jack, step stand assembly, safety chains, and water-resistant tail lights.

No matter which model you choose, the WFB Hoosier Trailers are built to make your boating experience a dream come true.

WFB332-10	5000	32'	40'	2100	32-36' Pontoons

Our **BX Series** of trailers offers extra strength for hauling larger pontoon boats.

Our **BX Series** of trailers are just as maneuverable as our tubulars, but with rectangular steel frames that offer extra strength for the larger pontoon models. Now pontoons with large outboard motors and extra accessories can be trailered anywhere—thanks to the Hoosier BX.

The BX is designed to carry most 20 to 30 foot pontoons. In addition, three axle configurations are offered with capacities ranging from 2,000 to 5,000 pounds. This, combined with Hoosier's adjustable load-equalizing torsion axle, gives the BX unmatched road stability.

Other features include: frame stanchions that are bushed for strength and longevity, tie-down loops, automatic brake winch, adjustable latch with pins, tail light cage, and 5.30 x 12 inch "D" range tires. In addition, electric winch, hydraulic lift system, surge brakes, I.O. kit and a durable galvanized finish are offered as options.

BX Specifications: Frame available in 48" or 44" widths, 38" axle base, maximum raised height 38", minimum lowered height 23".

*The original,
time-tested
design of the
Classic Series.*

The time-tested tubular design of the **Classic Series** provides the strength to handle loads 2,000 to 5,000 pounds and can carry pontoons 16 to 26 feet long. Its 48" wide design and low center of gravity make it very stable on the road.

Each Classic features a unique winch, cable and sheave system. This enables the operator to raise and lower the entire trailer frame. This approach extends to the adjustable tongue which provides extra trailer length for launching.

Standard features include: water-resistant tail lights, eight rubber rollers for boat protection, tail light cages, an adjustable trailer frame, leaf springs, safety cable and 5.30 x 12 inch "D" range tires.

The SL650, 700 and 725 Series are available in three axle configurations, with or without brakes. Classic trailers are designed to haul pontoons with 40 hp motors or less. A Classic front extension is also offered for pontoons with extended decks. In addition, tongue jacks, electric winch, and front loading winch options are available for even easier trailering.

The Hoosier
Mini-Toon
Trailer—
a specialized
trailer for
today's down-
sized pontoons.

For mini-pontoon owners, we have a special trailer just for you. Our Mini-Toon Trailer possesses the same quality Hoosier Trailers are known for, but in a size that makes trailering a breeze.

The Mini-Toon Trailer comes in three models with bed lengths ranging from 12 feet to 16 feet and weight capacity of 1400 pounds. Constructed of durable steel to withstand rugged use, the Mini-Toon Trailer is equipped with a Reliable torsion axle with 12" standard tires, adjustable bunks, winch stand and a front loading winch and strap.

HMT 716-12	1400	16'	22'	400	7x18' Pontoons

Spreuer and Son built the first pontoon boat trailer in 1957. Forty years later, Spreuer's Hoosier Trailers can be found throughout America's waterways. These durable "work horses" have been a reliable partner for thousands of boaters. That's why we call them, "America's Way to the Water."

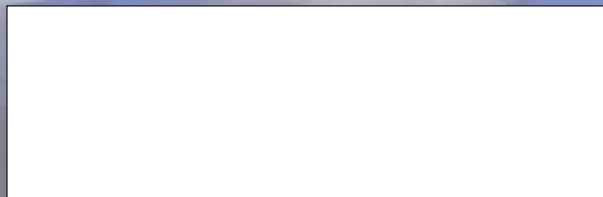

Our tradition has been a good foundation. But we're not content to base our success on the past. We continue to make advances that keep us at the front of pontoon transportation. It's a position of leadership we intend to keep.

The majority of all trailer components are manufactured in the USA.
